PROFESSIONAL SUMMARY

Senior iOS Developer with 6+ years of experience designing, building, and maintaining production-grade iOS apps for ride-hailing and location-based products. Strong expertise in Swift, UIKit, and SwiftUI, with hands-on RxSwift and working knowledge of Objective-C. Experienced in product-based and startup environments, owning features end-to-end and contributing to large-scale existing codebases. Skilled in mobile architecture, performance optimization, code quality, and cross-functional collaboration to deliver scalable, user-centric iOS solutions.

EMPLOYMENT HISTORY

Apr 2025 — Aug 2026

iOS Developer L4 (Remote), Motive

Lahore

Motive is a fleet management and compliance platform helping commercial drivers and fleet operators manage Hours of Service (HOS), vehicle tracking, and regulatory compliance across the US, Canada, and Europe.

- Designed, developed, and maintained the Motive Driver App, a mission-critical iOS application enabling commercial drivers to track activity and comply with HOS and cycle regulations.
- Worked with MVVM and MVC architectures in a large-scale, programmatic UIKit codebase supporting a wide range of iOS devices.
- Implemented new features and performance improvements while ensuring backward compatibility, stability, and scalability in a regulated domain.
- Used RxSwift, Fastlane, Jenkins, and CI/CD pipelines to automate builds, improve code quality, and accelerate delivery cycles.
- Wrote unit tests and supported test automation to ensure reliability in a safety-critical, compliance-driven environment.
- Collaborated with product managers, designers, and QA through Agile ceremonies to deliver features aligned with the product roadmap.

Oct 2024 — Apr 2025

iOS Consultant (Hybrid), The White Boutique (Startup)

Lahore

A UAE-based luxury gifting platform offering customized gifts with scheduled delivery for special occasions.

- Led end-to-end development of the iOS app using SwiftUI, delivering a responsive, user-friendly shopping experience.
- Designed and implemented a scalable MVVM architecture for clean separation of concerns and long-term maintainability.
- Integrated RESTful APIs for real-time data handling and seamless backend communication, collaborating directly with stakeholders on requirements.

Oct 2021 — Sept 2024

Senior iOS Developer (Hybrid), Jeeny, (Rocket Internet)

Lahore

Jeeny is a ride-hailing platform operating in Jordan and Saudi Arabia, offering affordable, reliable transportation for passengers while supporting driver earnings.

- Developed and maintained Jeeny's Passenger app (MVVM) and Driver app (MVC), within a large engineering org (~13–15 iOS engineers, ~200 overall).
- Implemented new features and enhancements driven by user feedback, business needs, and market demands.
- Maintained and refactored existing codebases, managing version control and CI workflows in a multi-developer environment.
- Partnered closely with Product and Design to deliver roadmap features focused on usability and performance.
- Actively participated in Scrum and Kanban practices, including sprint planning, backlog grooming, and task prioritization.

Jul 2020 — Aug 2021

iOS Developer, Pentaloop

Lahore

Product-based company building multiple consumer iOS applications, with a primary focus on a subscription-based VPN product supported by ad monetization.

- Designed and implemented core VPN features, ensuring secure, performant, and seamless user experiences.
- Implemented and optimized ad monetization, mediation networks, and In-App Purchases (IAP) to drive engagement and revenue.
- Identified and resolved performance and threading issues, improving app stability and responsiveness.

EDUCATION

Oct 2016 — Aug 2020

BS Software Engineering, University of the Punjab (PUCIT)

Lahore

CGPA: 3.51/4.0

SKILLS

Swift Programming	In-App Purchases, StoreKit
UIKit	Scrum and Kanban
SwiftUI framework	Firebase Crashlytics
MVVM & MVC	Jira
Cocoa Pods & Carthage & SPM	Git with Bitbucket and Github
Push Notification Implementation	Objective C
Reactive programming with rxswift	MapKit
Unit Testing using XCTest	Google Maps
Core Bluetooth	RESTful API integration
Jenkins	

LANGUAGES

English	Good working knowledge
